

**SMART METERING / ENERGY CONTROLLING JOINT BOOTH
SUPPLEMENTARY AGREEMENT TO THE APPLICATION FORM FOR THE SMARTER E EUROPE 2019**

The latest trends and innovations in smart metering / energy controlling

Smart meters are the interface between smart buildings and smart grids. As a result, they are used in building services engineering and supply grid infrastructure – no longer just for electricity, but also for heat, cooling etc. The ongoing digitalization of the new energy world is creating great potential for smart metering and energy controlling applications. Smart meters enable improved regulation of grids and resources and, along with automated load management, are an essential part of intelligent future-oriented networks. They are a precondition for efficient energy monitoring and controlling and a key element of energy management in industrial enterprises, singular properties, building complexes and neighborhoods.

Present your solutions for smart metering, the operation of metering points, energy monitoring and controlling as well as energy management systems at the "Smart Metering / Energy Controlling joint booth" at EM-Power in hall C4.

EM-Power is a unique platform for acquisition, exchange and information on the topic of smart energy generation and consumption in industry and buildings. It presents renewable and efficient energy technologies, smart energy management systems and services as well as operator models which are crucial for the professional prosumers of today and tomorrow.

Register now and take advantage of especially favorable conditions.

At no extra cost, participating companies will enjoy:

- Booth construction (overall design, floor covering, lighting, decoration)
- Lockable counters with printed logo
- Booth cleaning and surveillance
- Power connection (up to 3 KW)
- Seating in booth space
- Additional mention (logo and link) at
→ www.EM-Power.eu → Program → Smart Metering

By signing the attached application form for EM-Power 2019 and this supplementary agreement, we confirm our participation in the Smart Metering / Energy Controlling joint booth at EM-Power 2019.

Notwithstanding the services, obligations and prices specified in the application form and the general terms and conditions of participation, the following applies to participation in the joint booth:

- Special terms and conditions apply to exhibitors registered for the parallel exhibitions who are also interested in the joint booth at EM-Power, as well as to exhibitors from last year's Intersolar Europe, Power2Drive Europe, ees Europe and EM-Power and to members of the German Association of Energy Market Innovators (bne). Get in touch!
- Participants will be included in the regular exhibitor list, with the designation "Smart Metering / Energy Controlling joint booth".
- The price for taking part in a joint booth is €390/sqm plus external costs (fees for waste removal, Association of the German Trade Fair Industry, catalog entry).
- The organizer is responsible for booth construction. Other structures must fit the overall concept of the joint booth and are therefore only allowed in consultation with the organizer

We hereby book the following package arrangement

(please check where applicable)

- SMALL 4 sqm
- MEDIUM 9 sqm
- LARGE 12 sqm

We are interested in giving a presentation at the Compact Energy Forum:
yes no
