The value-driven UMG 96-EL energy analyzer helps you to control your energy costs and assists with billing and planning. The precise measurement data enables you to optimize your energy consumption and implement energy management.

The UMG 96-EL can be easily integrated into existing systems so that the measurement data can be evaluated without complications. The energy analyzer can be connected directly to the system via the Ethernet connection. The front panel display makes it easy to read the measured values directly on-site.
