19.06.2026

meteocontrol introduces bluelog Neo, a new platform for control, monitoring and energy management of PV, battery storage and hybrid plants. Designed for increasingly complex renewable energy projects, the solution combines high processing power, integrated cybersecurity and flexible software licensing. bluelog Neo supports operators, EPCs, IPPs and O&M service providers in meeting grid compliance, availability and efficient operation requirements. Market availability is planned for the fourth quarter of 2026.
